Book now | Contact | Book free trial | View Availability

One smart search

Teachers, group classes, packages and courses.

Context-aware results

Considers subject, topic, skill level and goals.

Search for teachers, classes and courses in plain language and get results that match what you mean.

AI FEATURE 2 OF 5

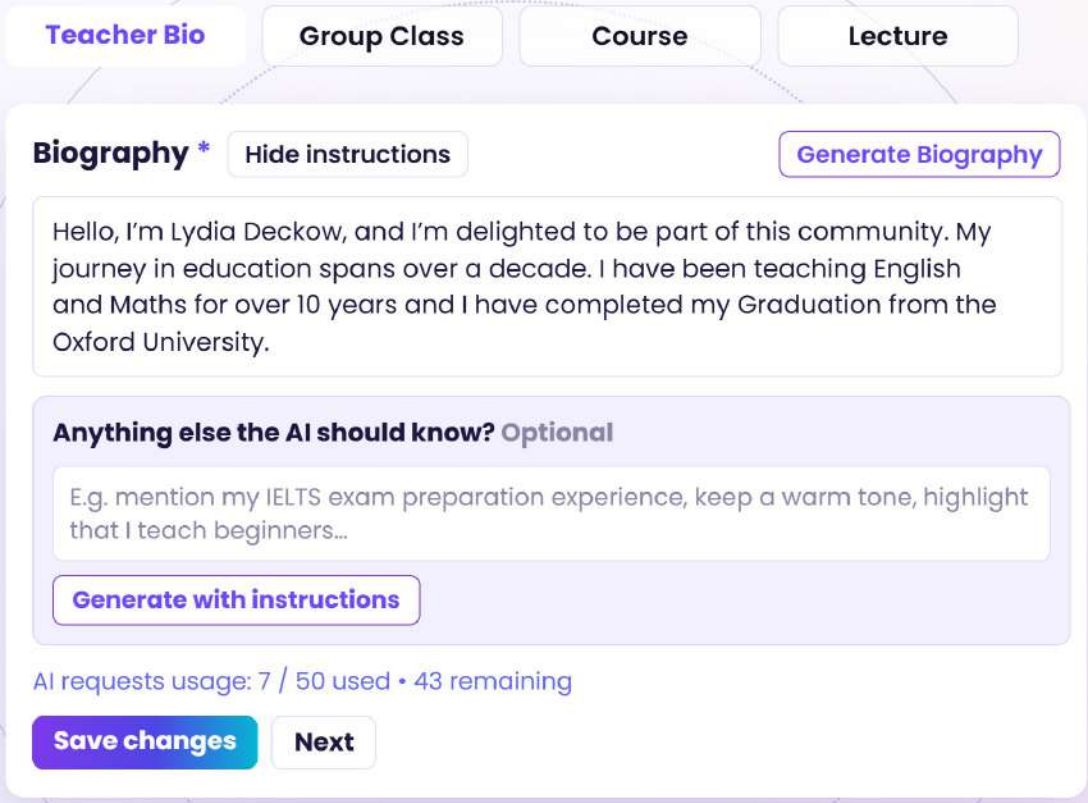
AI Content Generation

One-click generation

Biographies, class, course and lecture descriptions.

Prompt box for details

Add additional context to guide the result.



Review, edit, regenerate

Fine-tune the content before you save it.

Admin-controlled

Enabled and limited from the AI Tools module.

Generate teacher biographies and class, course and lecture descriptions in one click.

AI FEATURE 3 OF 5

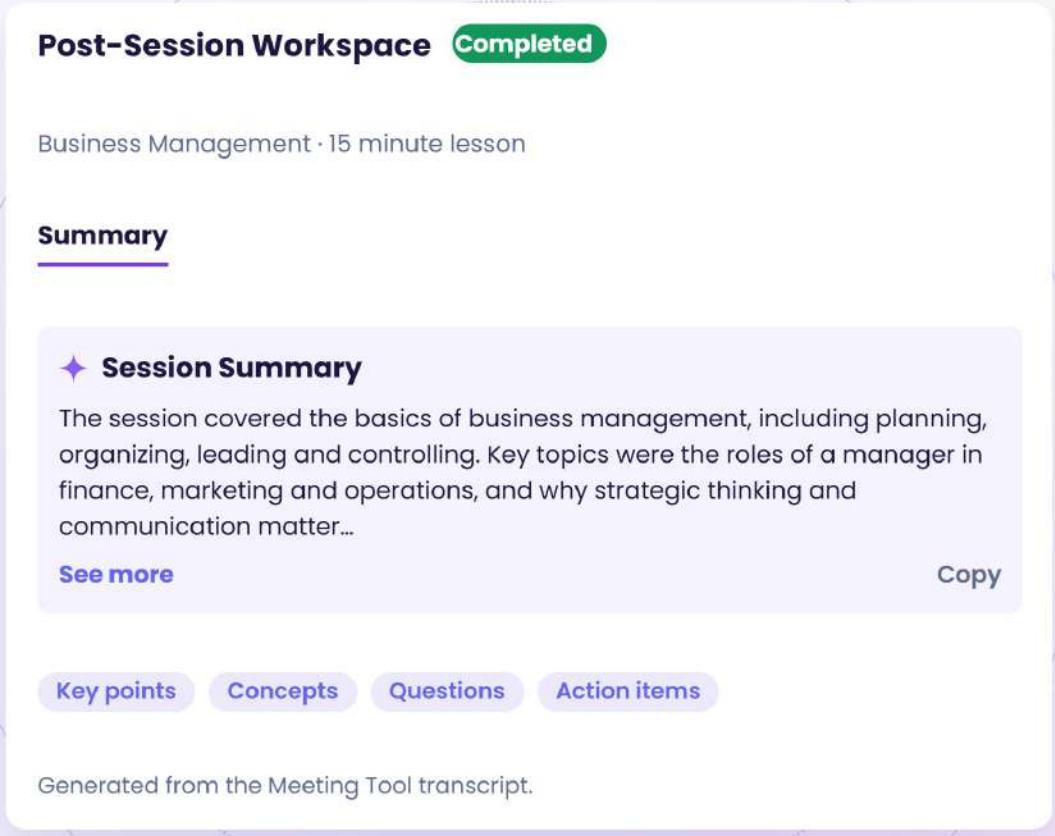
AI Session Summaries

Automatic summaries

Key points, concepts, questions and action items.

Works with your meeting tools

LessonSpace, Pencil Spaces, Zoom and Jitsi.



Post-Session Workspace

Summary, notes, lesson plan, homework, quizzes.

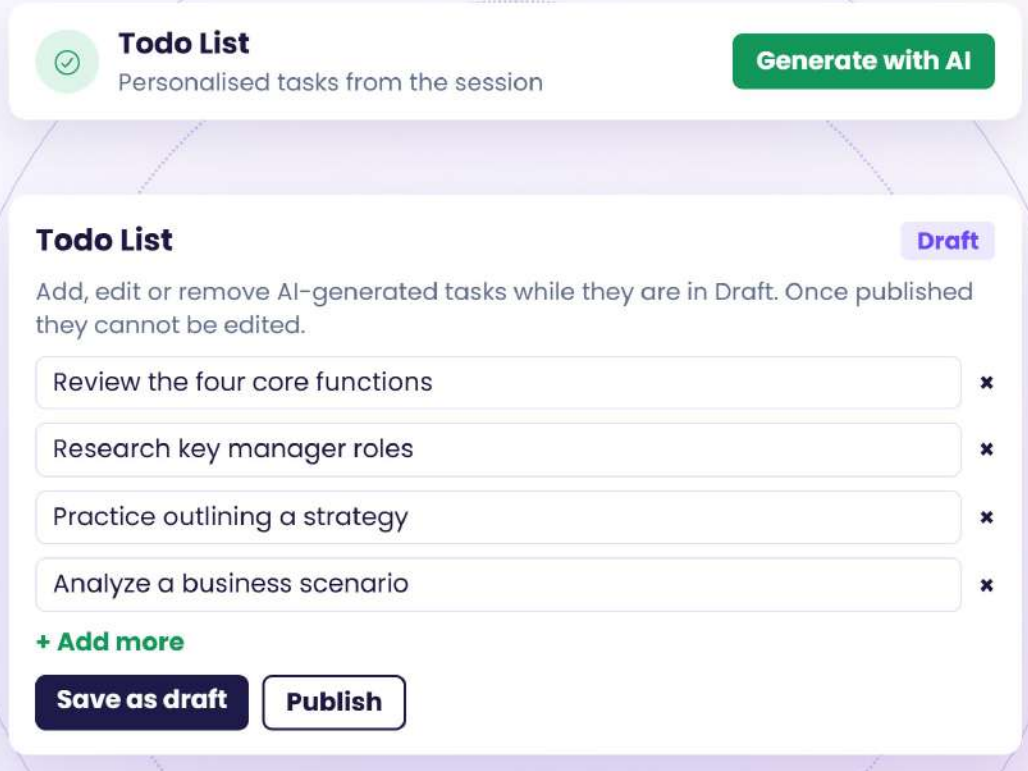
Reliable delivery

Auto-retry for 24 hours, then manual trigger.

After every session, teachers and learners get an AI summary of key points discussed during the session and action items.

AI FEATURE 4 OF 5

AI To-Do Lists



AI-drafted tasks

Based on topics, concepts, questions and actions.

Saved as draft first

Teachers edit, delete, add and publish.

Learner checklist

Learners mark tasks as completed.

Teacher tracking

Monitor progress from the Post-Session Workspace.

AI turns the session transcript into follow-up tasks that teachers review, edit and publish to learners.

AI FEATURE 5 OF 5

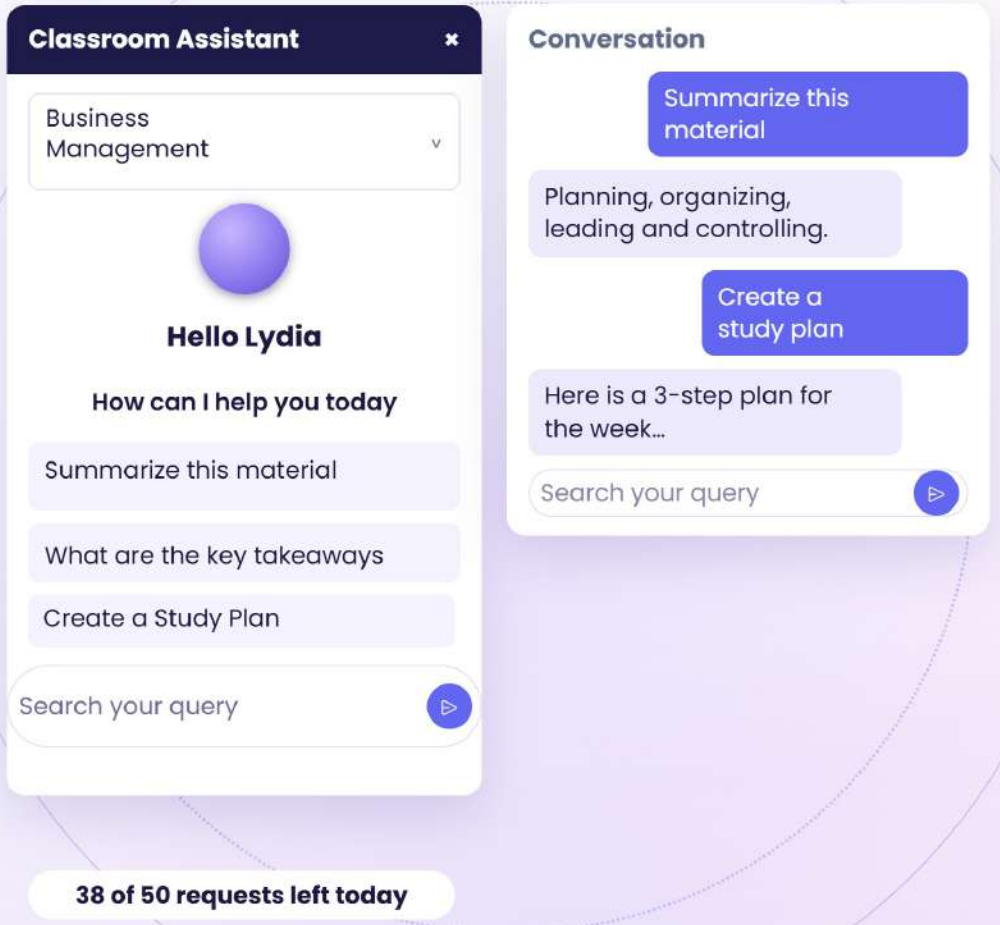
AI Classroom Assistant

Pick your study material

Choose a lesson, class or course first.

Continuous conversation

Ask follow-up questions in the same chat.



Answers with citations

Every reply points to the source content.

Admin-set usage limits

Available again the next day.

Learners ask questions about their lesson, class or course and get answers that cite the source material.

NEW FEATURES

Four new features for real-time engagement

1 ALERT

Instant Notifications

Pop-up alerts, even when the site is in the background.

2 CHAT

Real-Time Messaging

New messages appear with no page refresh.

3 NOTIFY

WhatsApp Notifications

Alerts for bookings, reminders and payments.

4 REPLAY

Recording Playback

Admins enable or disable Pencil Spaces playback.

Powered by Firebase, WebSockets, Twilio and Pencil Spaces

NEW FEATURE 1 OF 4

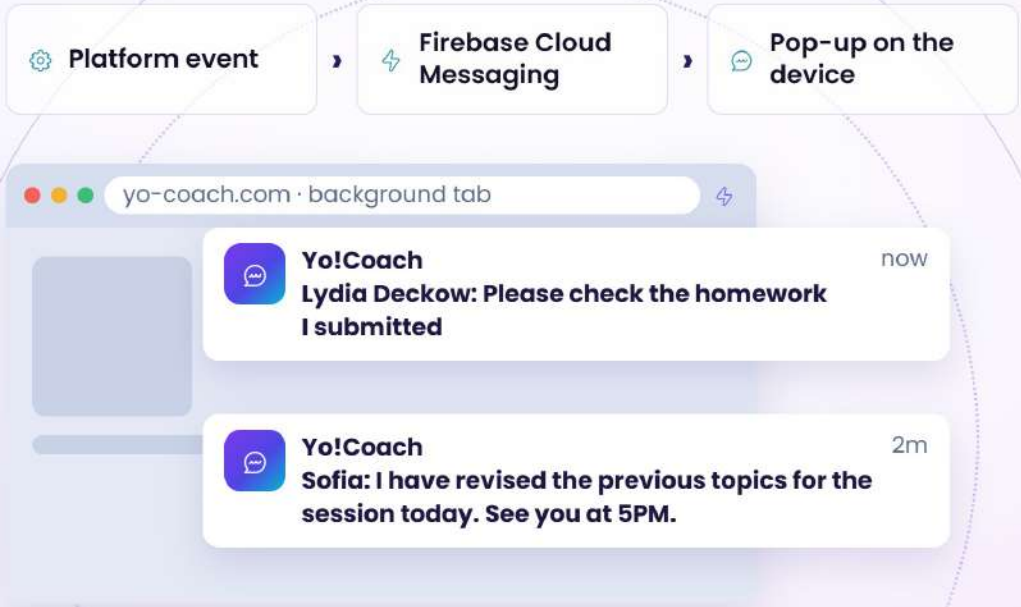
Instant Notifications

Instant pop-ups

Shown even when the site runs in the background.

Admin-configured plugin

Set up under Third-Party APIs in the admin panel.



Better engagement

Timely updates keep users in the loop.

Platform-wide

Real-time notifications across the platform.

Firebase Cloud Messaging sends instant pop-up notifications, even when the site is in the background.

NEW FEATURE 2 OF 4

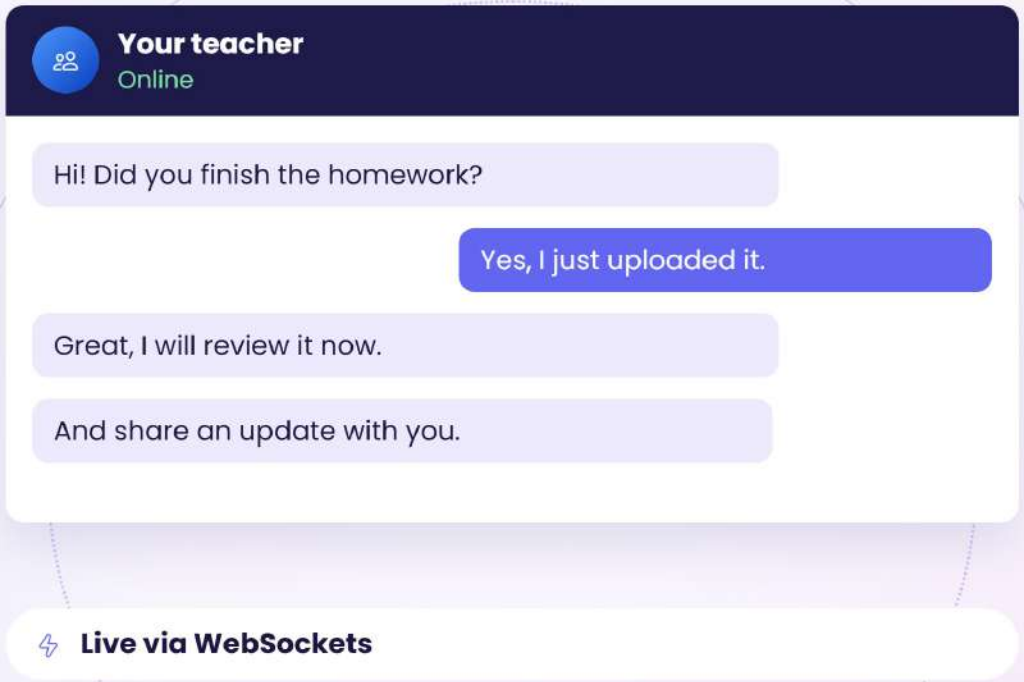
Real-Time Messaging

Instant delivery

New messages appear without refreshing the page.

Smoother conversations

A more seamless communication experience.



Across the platform

Real-time updates in every chat.

Powered by WebSockets

Live updates inside the chat interface.

WebSockets deliver new chat messages instantly, with no page refresh.

NEW FEATURE 3 OF 4

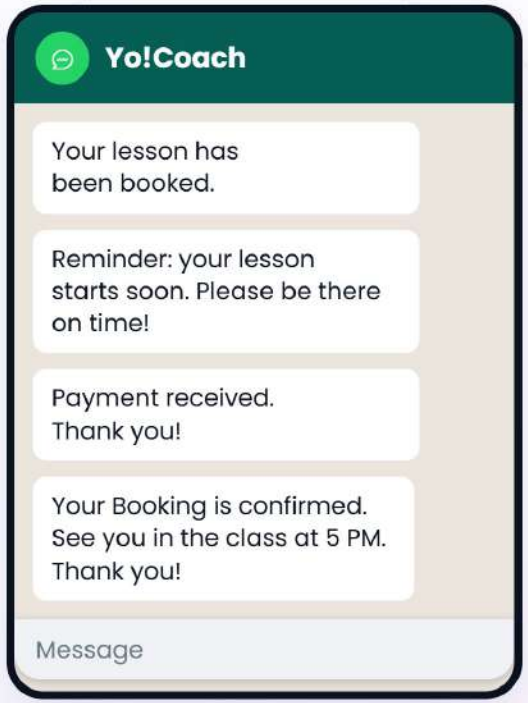
WhatsApp Notifications

Number at registration

Provided during registration.

OTP verification

Verified by OTP and linked to the account.



OTP verified

Twilio

Event alerts

Bookings, reminders, cancellations and payments.

Other activities

And other supported platform activities.

Twilio sends WhatsApp alerts for bookings, reminders, cancellations and payments after verification.

NEW FEATURE 4 OF 4

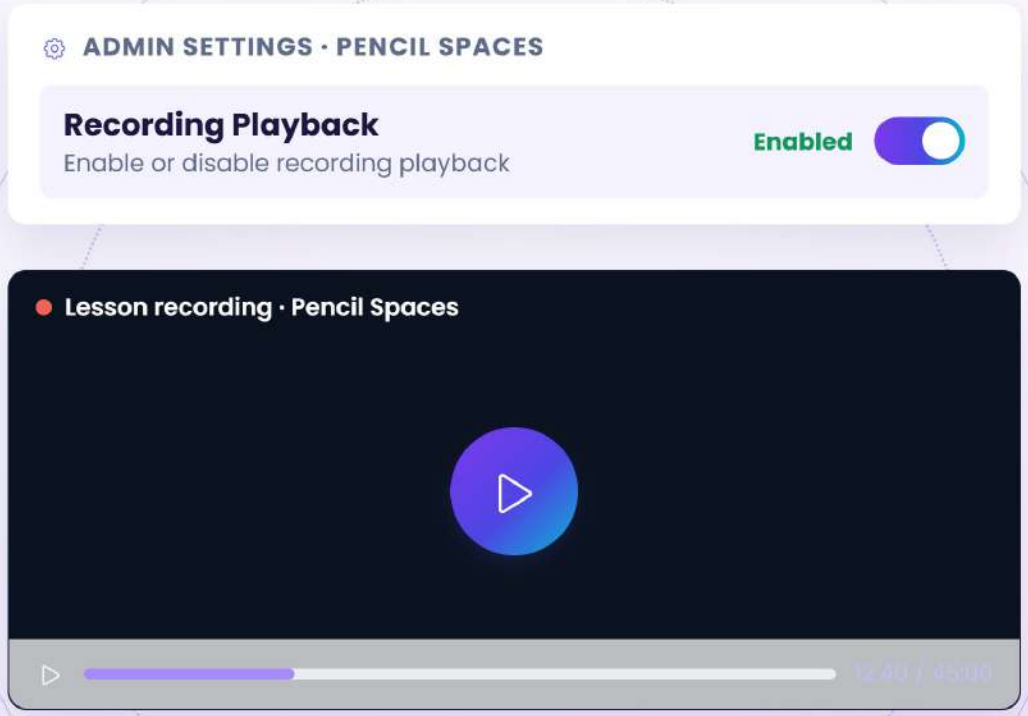
Pencil Spaces Recording Playback

Admin control

Enable or disable playback from the admin panel.

Recording playback

Replay recorded Pencil Spaces sessions.



On or off anytime

Switch the option to suit your platform.

Pencil Spaces

Works with Pencil Spaces virtual classrooms.

Admins can enable or disable recording playback for Pencil Spaces sessions.

ENHANCEMENTS

Eight enhancements to the everyday experience

ENHANCEMENT 1

WebP Image Support

Smaller images, faster pages.

ENHANCEMENT 2

SVG Logo Support

Sharp logos at every size.

ENHANCEMENT 3

Theme and Font Control

Themes, fonts and a WCAG score.

ENHANCEMENT 4

Post-Session Workspace

Summary, lesson plan, quizzes, to-dos.

ENHANCEMENT 5

Google Maps API

Now on the new Google Places API.

ENHANCEMENT 6

Stripe

Upgraded to the latest Stripe SDK.

ENHANCEMENT 7

PayPal

Aligned with the new PayPal SDK.

ENHANCEMENT 8

Mailchimp

Updated for PHP 8.3 compatibility.

Plus a platform upgrade from PHP 8.3 to PHP 8.5

ENHANCEMENT 1 OF 8

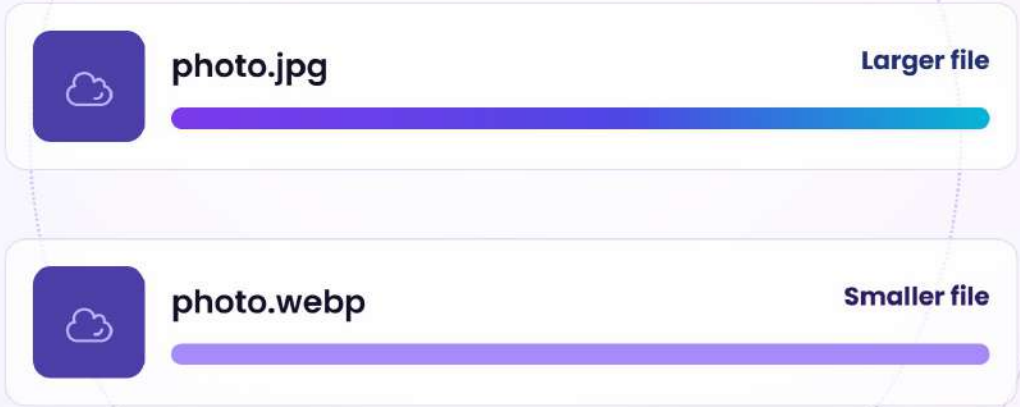
WebP Image Support

Better compression

Smaller image files.

Faster loading times

Pages load quicker everywhere.



Improved performance

A smoother experience overall.

Upload and display

WebP images work across the platform.

WebP support means smaller images, faster pages and better performance across the platform.

ENHANCEMENT 2 OF 8

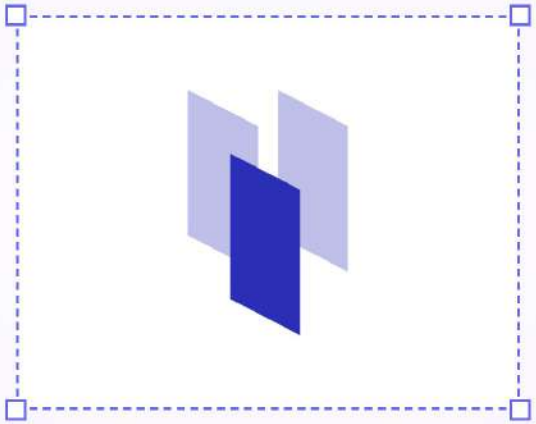
SVG Logo Support

Better visual clarity

Sharp, clean logos.

Fully scalable

Looks great at every size.



Header

Favicon

Consistent quality

Across screen sizes and resolutions.

Upload and manage

SVG logos managed within the platform.

Upload SVG logos for sharp, scalable branding on every screen size.

ENHANCEMENT 3 OF 8

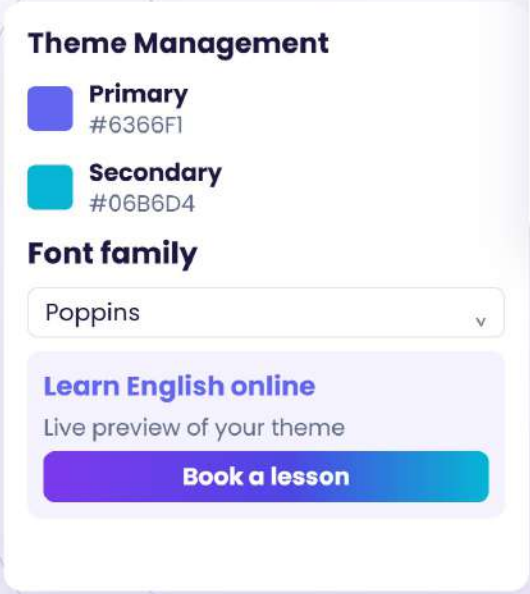
Theme and Font Control

WCAG accessibility score

Based on colour contrast and font readability.

Smart recommendations

Tips to improve the score and user experience.



Admin-managed themes

Set themes and fonts from the Theme module.

Fonts and colours

Configure website themes and fonts.

Admins set themes and fonts and get a WCAG accessibility score with tips to improve it.

ENHANCEMENT 4 OF 8

Post-Session Workspace

ENHANCEMENT 4

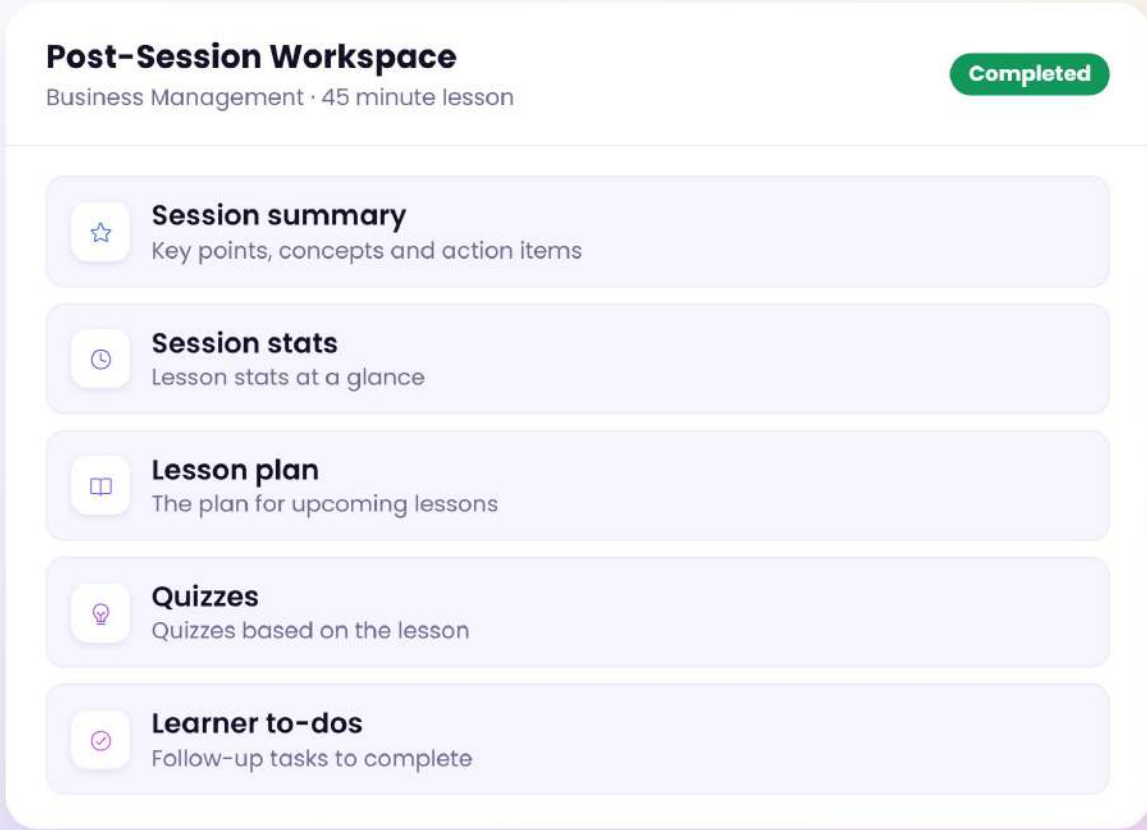
After every lesson

One screen after each lesson brings together the session summary, stats, lesson plan, quizzes and learner to-dos.

One screen per lesson
Everything from the session in one place.

For teachers and learners
Both see the same lesson outcomes.

Ready for next steps
Plan, practise and track progress.



Teachers and learners get one screen after every lesson with everything they need to keep learning.

ENHANCEMENTS 5 TO 8 OF 8

Integration Updates

Google Maps

Now implemented on the new Google Places API for location search and suggestions.

Stripe

Upgraded to the latest Stripe SDK.

PayPal

The integration now aligns with the new PayPal SDK.

Mailchimp

Updated for compatibility with PHP 8.3.

Payment, email and maps integrations are brought in line with current SDKs, PHP 8.5 and the new Google Places API.

PLATFORM UPGRADE

PHP 8.3 to PHP 8.5 Upgrade

Latest PHP release

The platform now runs on PHP 8.5.

Longer support

A longer window of official PHP support.

PHP 8.3 Before

→ UPGRADED

PHP 8.5 Now in V5.0

Modern foundation

Ready for the newest language improvements.

Compatible integrations

Platform code and integrations updated.

Running on PHP 8.5

Yo!Coach V5.0 now runs on PHP 8.5, upgraded from PHP 8.3.

SECURITY ENHANCEMENTS

Security Enhancements

Form security tokens
Tokens on every form.

Password encryption
Stronger, auto re-hashed.

Cookie security
SameSite on all setups.

Auth token generation
Created with bin2hex().

9 security enhancements

API key masking
Admin Panel keys are masked by default; only the first and last characters show.

Credentials in .env
Moved out of config files.

HSTS header
Configuration updated.

SQL injection fix
Queries are secured.

Session fixation
ID regenerated at login.

Nine upgrades protect forms, passwords, sessions, cookies, credentials and API keys.
