3. Add an email address and click on continue.(fig 5)

Fig. 5: AtomChat add email pop-up

4. Form will open in the same pop-up to add country and pincode.(fig 6)

Fig. 6: AtomChat Enter country and pincode page

- In the same pop-up, the payment page will open (fig 7) where different payment options are given, click on the one based on your preference.

Fig. 7: AtomChat payment pop-up

- Once payment is done, the account is set up. Details(password) will be sent on the mail id that was used initially to purchase the plan. Now click on <https://app.atomchat.com/users/login>. (fig 8)

Fig. 8: AtomChat go login page

7. After login, the dashboard page will open. Click on **Manage > Setting->Api keys.** (fig 9, 10)

Fig. 9: AtomChat go account landing dashboard page.

Fig. 10: AtomChat account dashboard page.

8. Copy **Api Key,App Id,Auth key** and paste it to the corresponding section in admin panel ([fig 1](#)) and click on **save. Atomchat** setup is done now.
9. Different configurations can be set in the Atomchat dashboard under different settings. (So that same setting will be reflected over the website while using Atomchat for online live classes). Some of them are given below.
10. Content Moderation **section (Setting->Content Moderation)**. Set what different settings can be banned while live classes. (fig 11)

Ban Settings

Do you want ban emails?
 Yes No

Do you want to ban phone numbers?
 Yes No

Do you want to ban hyperlinks?
 Yes No

Banned Words 

Banned Message:

Fig. 11: AtomChat content moderation settings page.

11. Authentication (**Settings->Authentication**). Set login and security settings. (fig 12)

Login Settings

How would you like your users to login to CometChat?

Single Sign-On login in your users (automatically) as soon as they login to your website/app.

Would you like guests to login as well?
 Yes No

Security

Enable Auth Key Verification?
 Yes No

Auth Key variable needs to be set before you enable this feature. You can read the [WordPress/ BuddyPress guide](#) or the [all other software guide](#) depending on the software you are integrating with.

Enable Data Signature Validation?
 Yes No

Data signature needs to be calculated from the MD5 digest of a string containing the ID, name and API Key (in that order) separated by commas. You can read the [WordPress/ BuddyPress guide](#) or the [all other software guide](#) depending on the software you are integrating with.

Enable users to signup when using proxies/VPN
 Yes No

Enable domain authentication
 Yes No

On enabling domain authentication, you need to enter domain names (for multiple domains enter comma separated values, eg. xxx.com,43-c.in). CometChat will be visible on entered domain(s) only. You can refer to the documentation [here](#).

Fig. 12: AtomChat Authentication settings page.

12. Layout Configuration (**Settings->Layout Configuration**). Set layout for live classes ChatBox.(fig 13)

Fig. 13: AtomChat Layout configuration settings page.

13. Role based access (**Settings->Role based access**). Set different permission based on multiple roles.(fig 14, 15)

Fig. 14: AtomChat Role based permission listing page.
