To collect these keys, follow below mentioned steps:

1. Login to your **Paystack Account**, If you don't have an account, create a new Paystack Account and Login. (Visit <https://paystack.com/> for **login/sign-up**)
2. Once logged-in dashboard page will open.( fig 2)

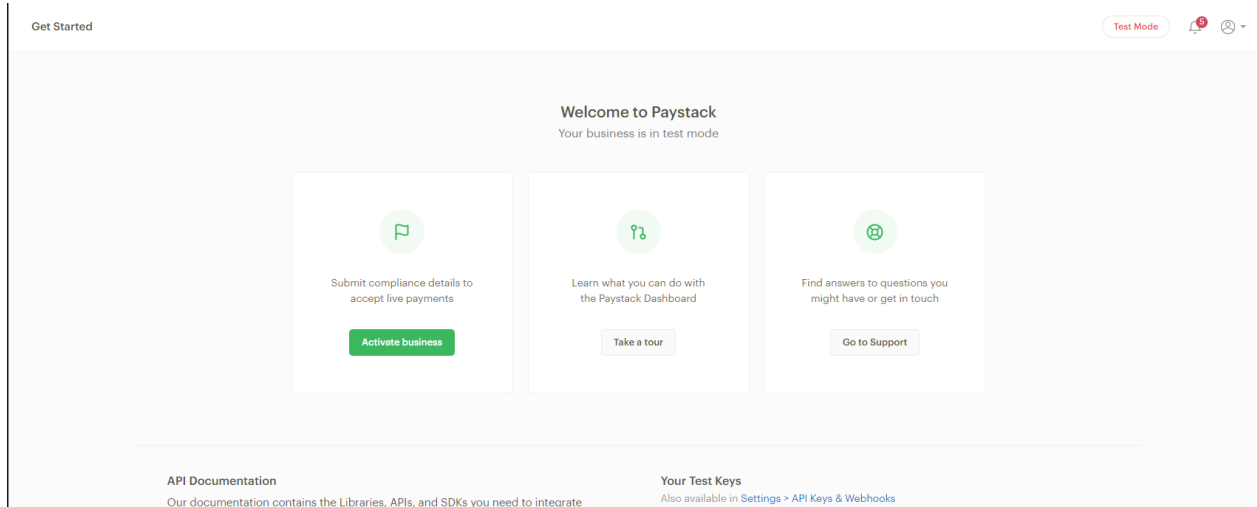

Fig. 2:Paystack account dashboard Page

3. By default, test mode (sandbox mode) of payment is on(You can see the “**Test mode**” button on top right corner of dashboard page), You need to submit all compliance forms to make live payment mode active.(fig 3)

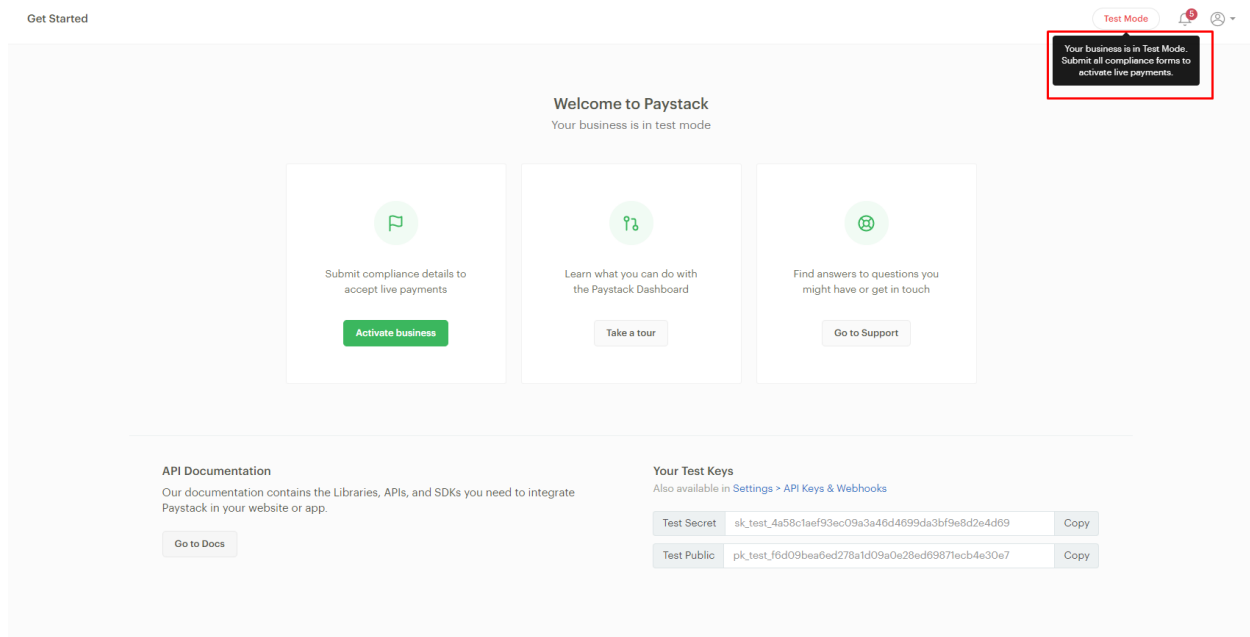

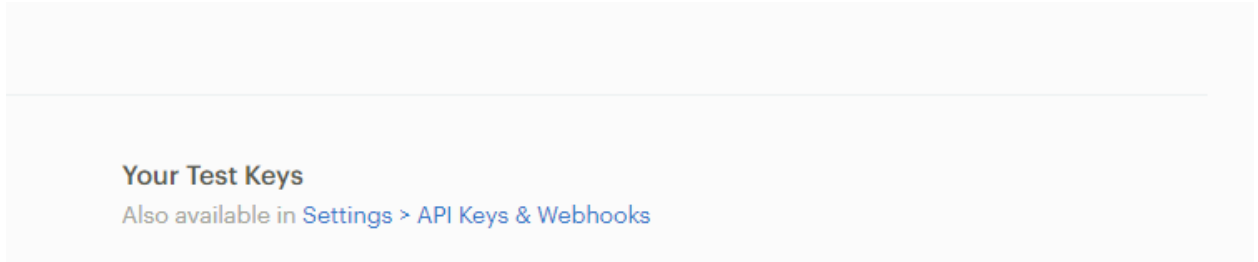

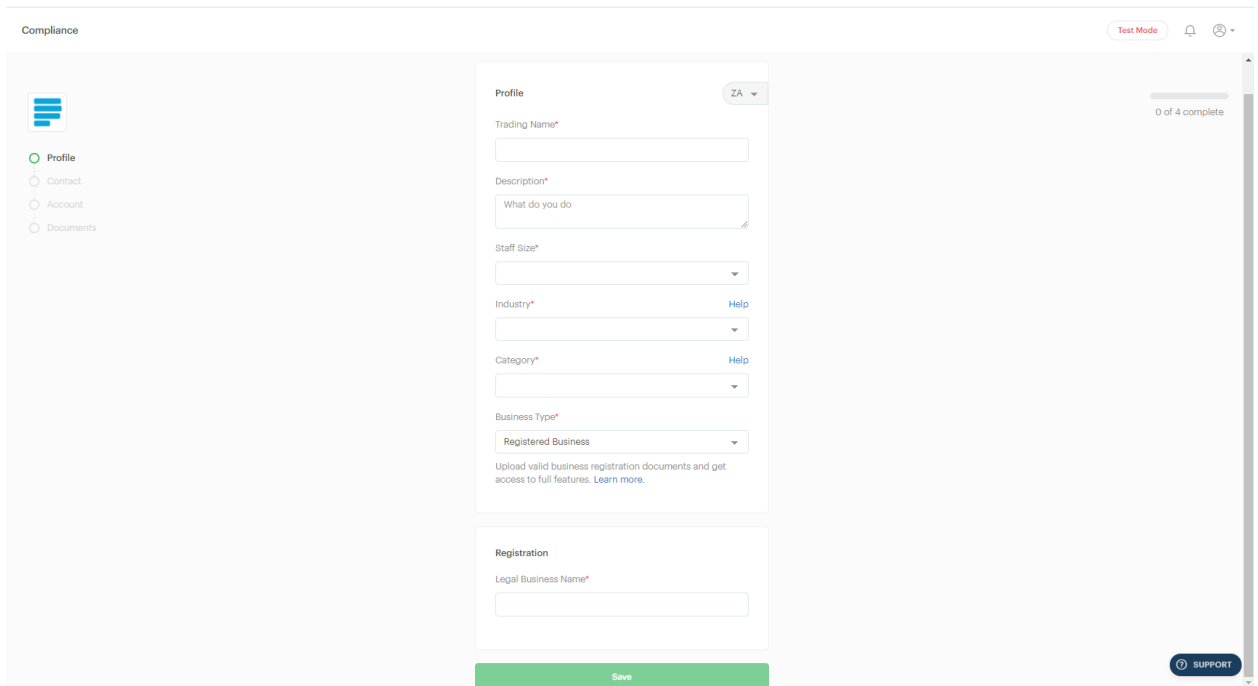

Fig. 3:Paystack account Test payment mode

- In the bottom right corner you can get the test mode credentials(fig 4), copy and paste them in the corresponding section inside the admin panel(refer [fig 1](#)). After this the test mode payment will be activated on the website.

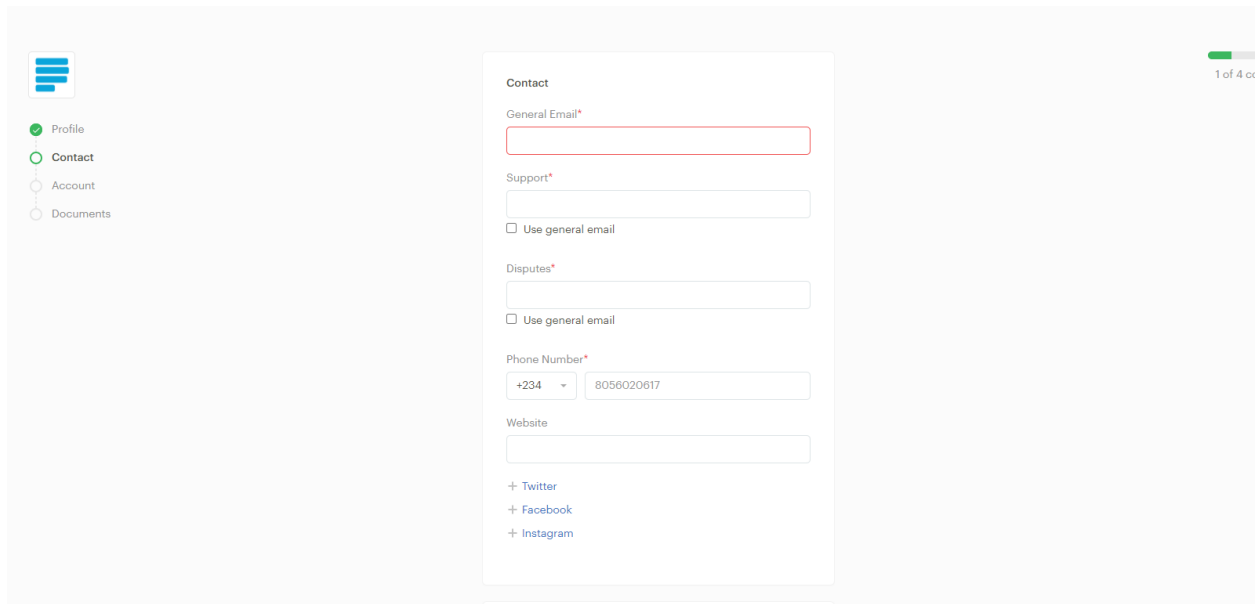

**Fig. 4:Paystack test credentials.**

- Click on **'Compliance'** from the left menu to go to the Compliance **section**. Here, fill up different forms and complete the profile for activating live payment mode. First one is the **'Profile'** page.(fig 5)

**Fig. 5:Paystack Compliance section profile setup page.**

6. After submission, you'll be redirected to the next form which is the **'Contact'** section. Fill this form and submit it.(fig 6)

8. After submission you'll be redirected to the next form, which is the **'Documents' section**. Fill this form and submit it.(fig 8)

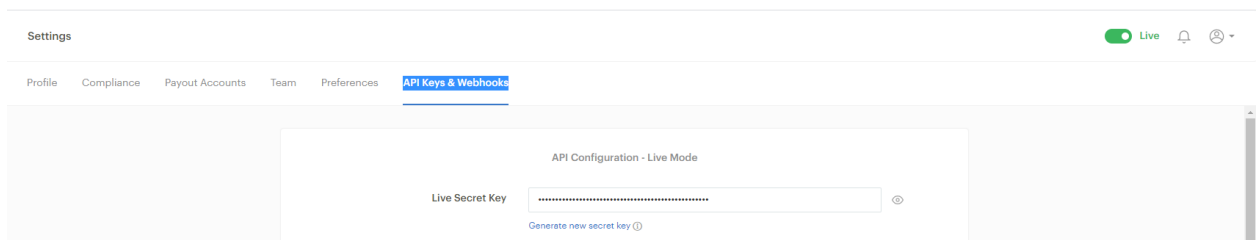

Fig. 8:Paystack Compliance section document form page.

- After submission of the **document form page** click on the **‘Activate Business’ button**. (fig 9)

**Fig. 9:PaystackActivate business page.**

- Click on **Settings->API Keys & Webhooks** to get live credentials. (fig 10)

**Fig. 10:Paystack live payment credentials**

- You can switch to live/test payment mode by clicking on the button available on the top right corner. (fig11)

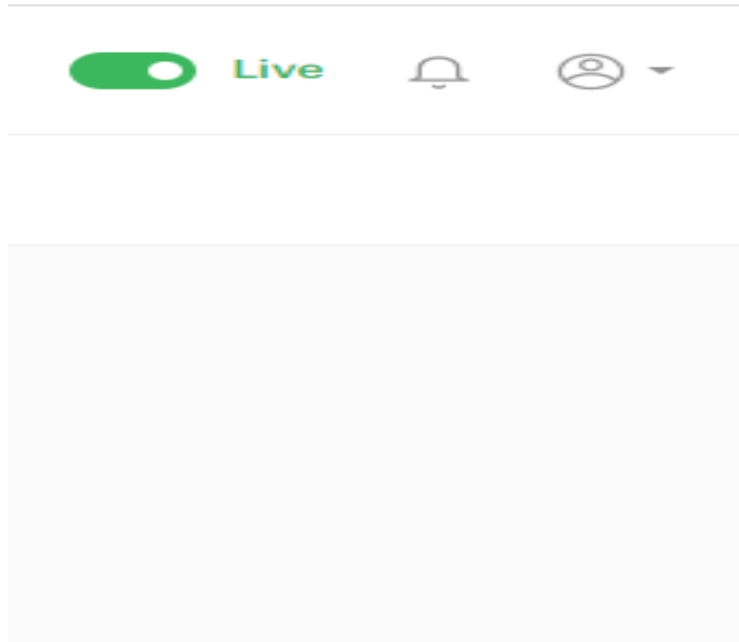

Fig. 11:Paystack switching payment mode button.

12. **Important** : You have to add **Live Callback URL/Live Webhook URL** or **Test Callback URL/Test Webhook URL** based on the payment mode currently in use. Failure to do this would result in payment success/failure data not sent back to the website from the payment gateway. (Refer fig 12 and 13)

Sample URLs :

**Callback URL** : <domain URL>/PaystackPay/callback/<order Id>

**Webhook URL** : <domain URL>/PaystackPay/webhook

Live Callback URL

Live Webhook URL

Test Callback URL
