

## Zoom Keys Setup Guide

Configure '**Zoom**' keys under **Settings > General settings > Zoom Api Keys**.  
(fig 1)

The screenshot shows a light blue header with the text 'Zoom Api Keys'. Below the header are three input fields, each with a label to its left: 'Zoom Api Key', 'Zoom Api Secret', and 'Zoom Jwt Token'. Each label is followed by a white rectangular input box with a thin border.

**Fig. 1: Zoom keys Settings (Admin panel)**

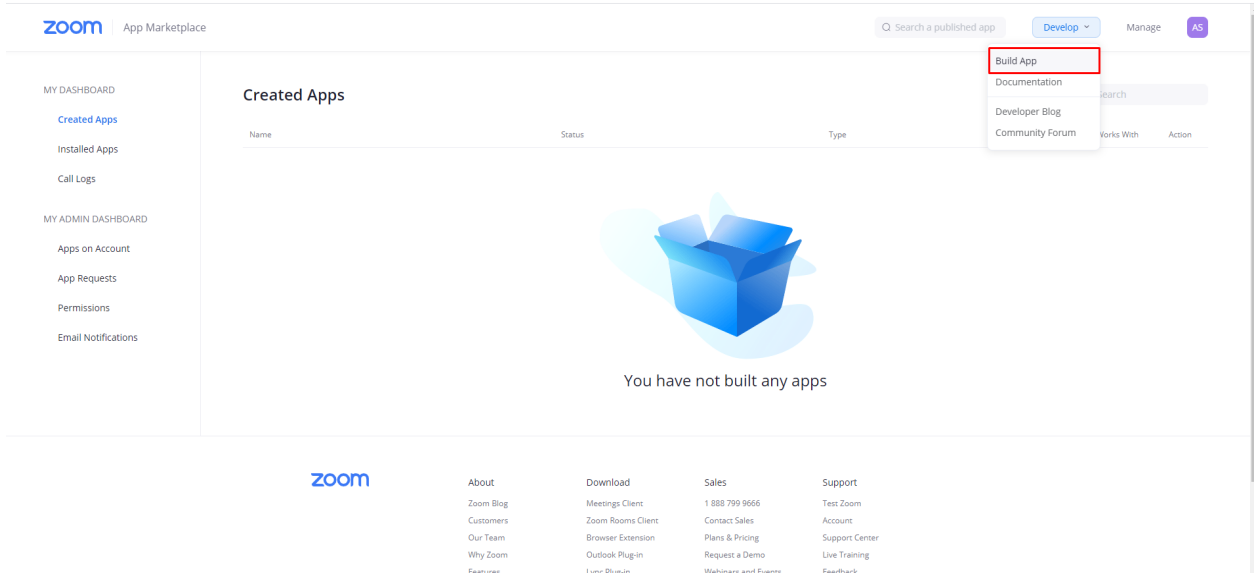

To collect these keys, Follow below steps:

1. Login to your **Zoom** Account, If you don't have one, create a new **Zoom** Account and Login. (Please visit <https://marketplace.zoom.us/> for login/sign-up)
2. Once logged in, you will be redirected to the **Dashboard** page. (fig 2 )

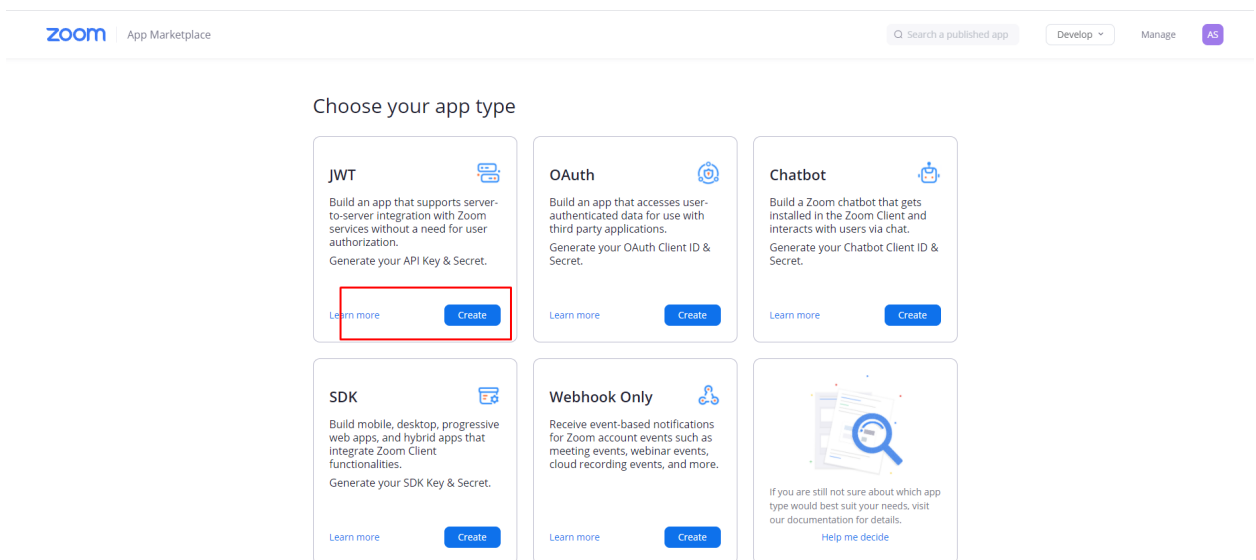

**Fig. 2: Admin Zoom account Dashboard**

3. Again, visit <https://marketplace.zoom.us/> and click on **Build APP** option under **Developer** drop-down.(fig 3)

**Fig. 3: Build App**

4. A new page of **Choose App type** will open (fig 4) . Click on the **create** button of the **JWT** section.

**Fig. 4: Choose App Type**

5. Give a name to your App and click on create. (fig 5)

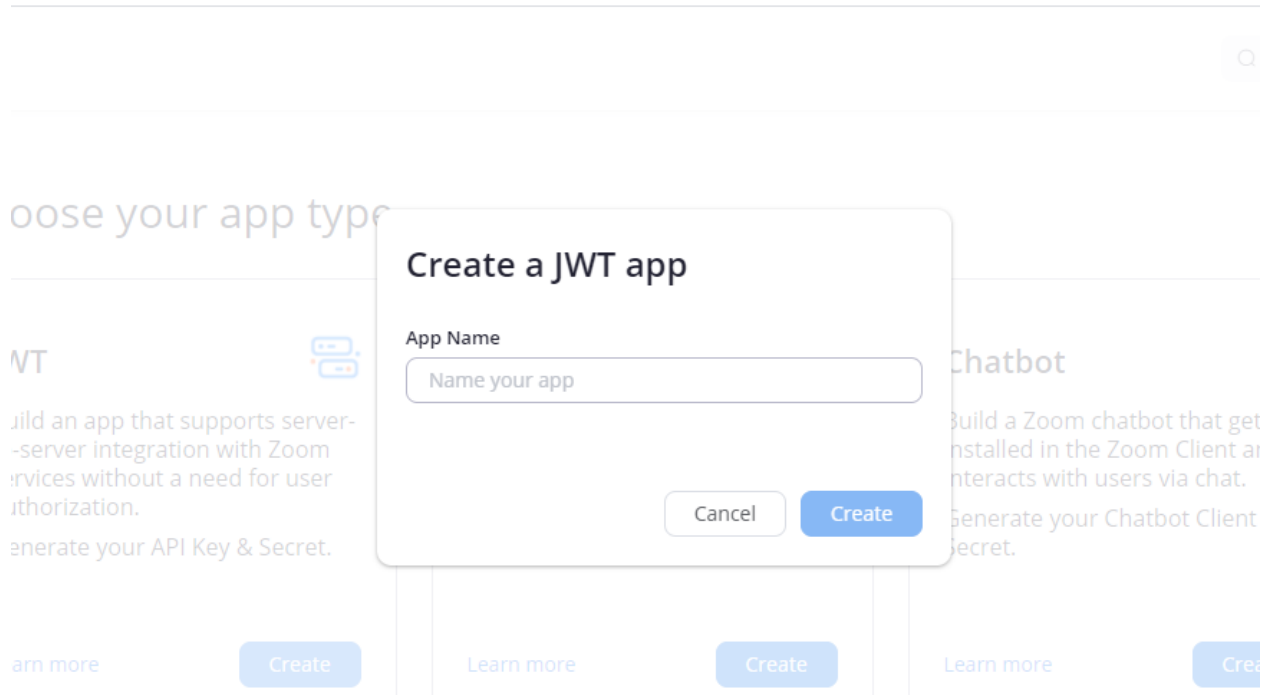

Fig. 5: Name your app

6. Now the App page will open, fill necessary details and click on continue. (fig 6)

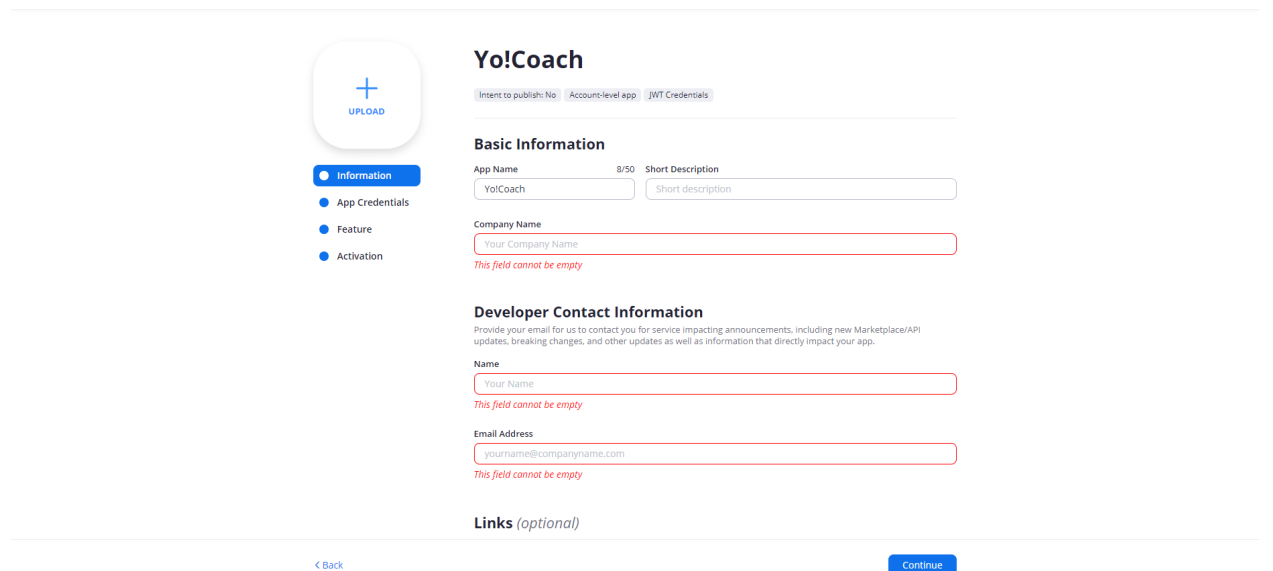

Fig. 6: App page

- Now the App credentials page will open, click on **View JWT token**, you will see **Expiration Time** is by-default **90 min** (selected), click on other and add a future expiry date.

Now copy credentials and add them to the settings section.(refer [fig 1](#)). Now click on **continue** on this App credentials page. You will see the Add **Feature** page.

- Here create different events like if a teacher is taking classes on Zoom App and he ends his class then class automatically ends on the website as well. Enable Event subscription. A section will open.(fig 7)

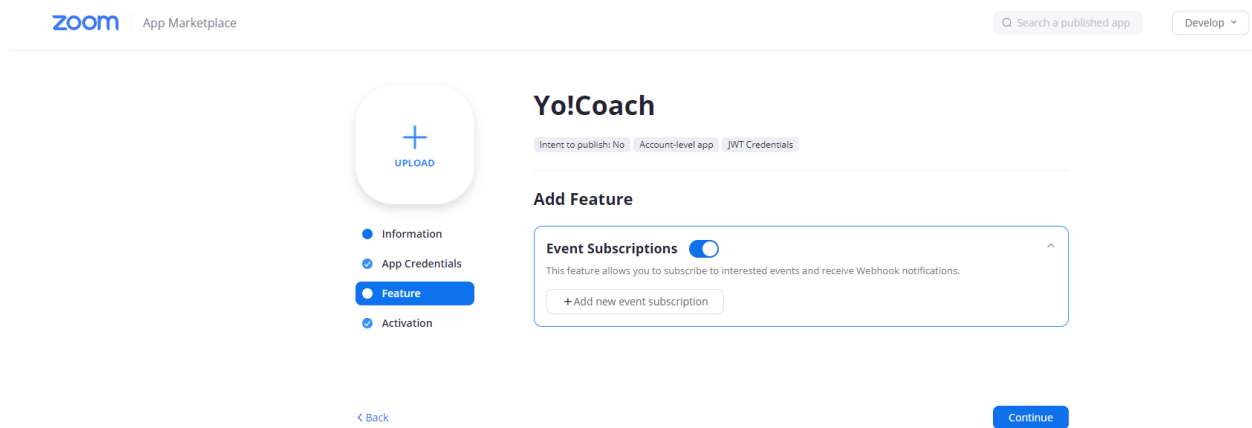

Fig. 7: Event subscription page

- Click on **add a new event subscription** button. And then click on **Add events** button (fig 8)
