

LessonSpace Integration Setup Guide

LessonSpace is one of the tools that can be used to host sessions on Yo!Coach. To be able to use LessonSpace, it has to be configured with the system from **Manage Settings > Meeting Tools > LessonSpace > Edit** form.

Meeting Tool Setup ✕

Api Key*

Recording

The higher-level component that represents the simplest way of getting started with the LessonSpace API is Launch API. It provides a series of convenience endpoints that allow you to create Spaces with various configuration options. It is for users looking for a way to quickly integrate Spaces into their platform.

Note: Recording will work when enabled from both, LessonSpace API settings on LessonSpace and Admin panel on the meeting tool LessonSpace settings.

To collect the **API Key**, follow the below-mentioned steps:

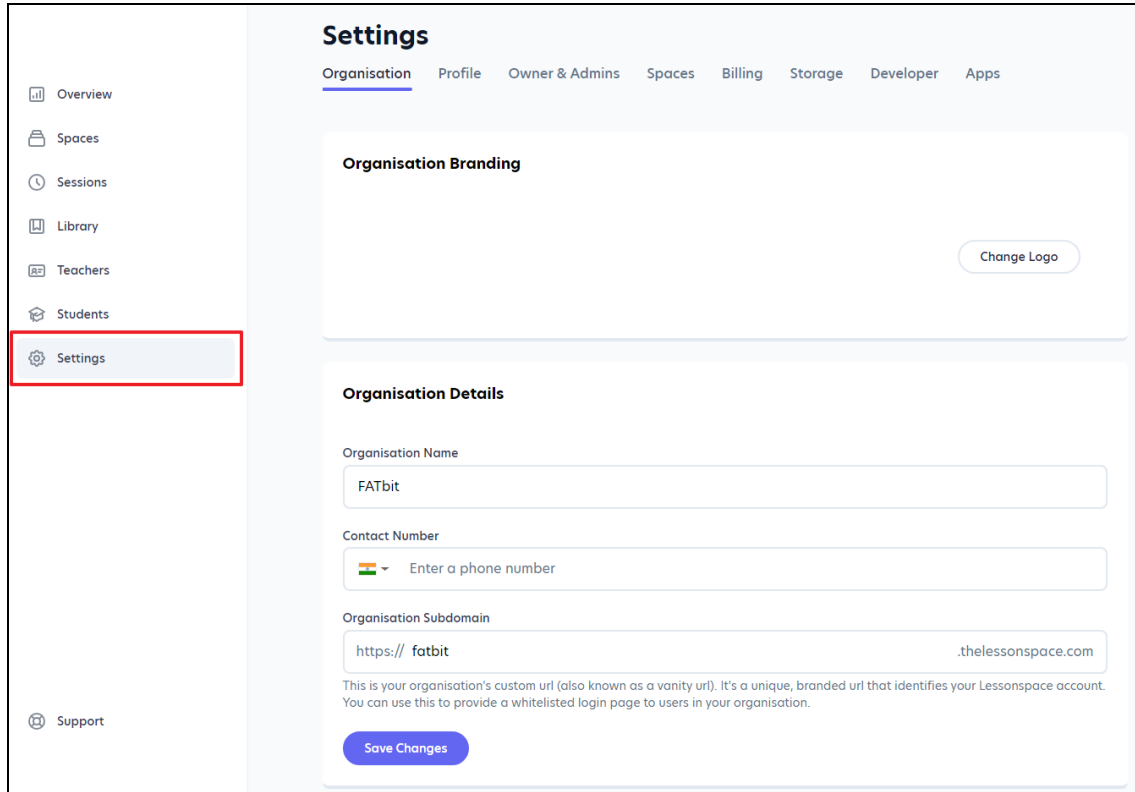

1. Log in to your LessonSpace account. If you don't already have an account, visit <https://www.thelessonspace.com/create-account> and follow the signup process.

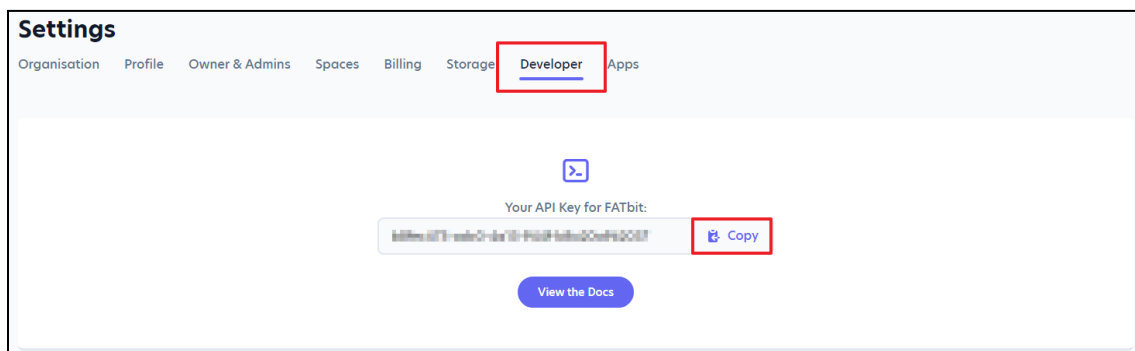

2. Once you are successfully logged in, you will be redirected to your account page.

3. From the left navigation menu, click on **Settings** to open the respective section.

4. Click on **Developer** from the top navigation menu and the **Developer** tab is opened on the screen. Copy the **API Key** displayed on this page.

5. Open the admin panel and navigate through **Manage Settings > Meeting Tools > Edit (Lessonspace)**. Paste the key in the **Lessonspace Meeting Tool Setup** window.

Have a look at the [LessonSpace Getting Started Guide](#) to see how to create spaces and share links with the learners.

To manage the storage related settings with LessonSpace, navigate to LessonSpace Dashboard > Settings > **Storage**. It is recommended to select the subscription plan according to your cloud storage requirements.

*Recordings will still be stored for a maximum of 24 hours, until our scheduled daily deletion.

**We don't mean "forever" as in until the heat death of the universe, but more like indefinitely.
