

[PayPal Plugin API Keys Configuration Guide](#)

The PayPal plugin is available for Yo!Coach users. This means that the users can make payments for their session orders using PayPal as the payment method at checkout. The PayPal Payout keys can be configured from **Manage Settings > Payment Methods > PayPal Standard > Settings**.

Merchant Email*

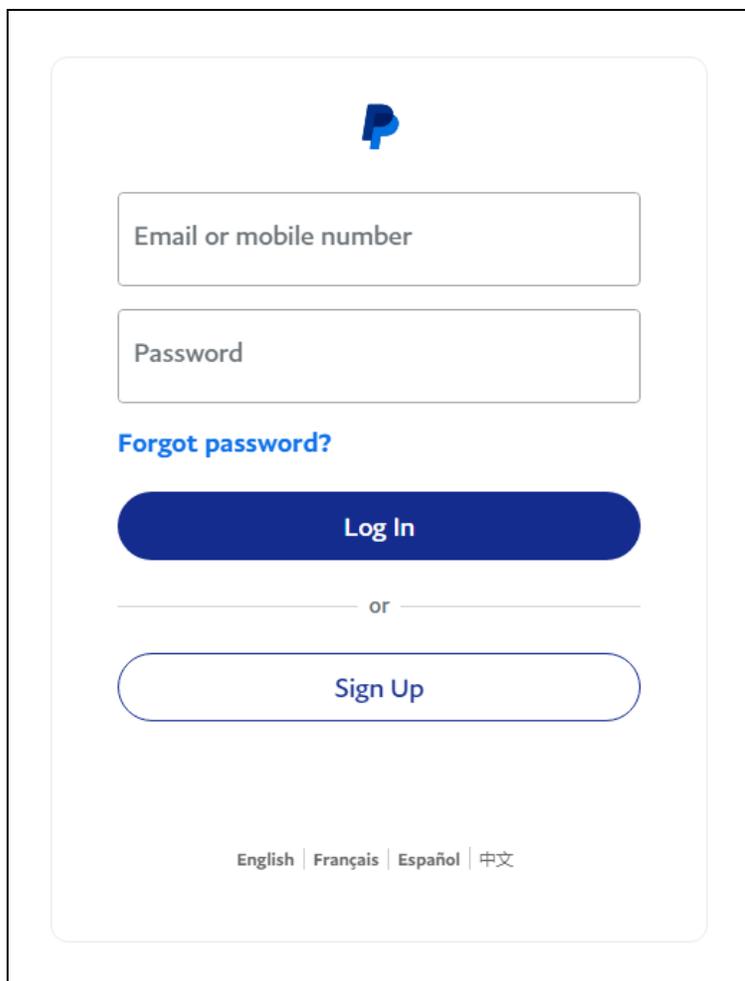

Enable Live Payment

PayPal Standard provides payment options for a quick and easy online payment solution. It lets you securely accept credit card, debit card, and PayPal payments on your website from any mobile device, tablet, or PC. You must have a PayPal Business or PayPal Premier account to integrate this API.

To collect these keys, follow the below-mentioned steps:

1. Visit <https://developer.paypal.com/home> and log into your PayPal Account.

The image shows a PayPal login and sign-up interface. At the top center is the PayPal logo. Below it are two input fields: "Email or mobile number" and "Password". Under the password field is a link that says "Forgot password?". Below that is a dark blue button with the text "Log In". A horizontal line with the word "or" in the center separates the "Log In" button from the "Sign Up" button. The "Sign Up" button is white with a blue outline. At the bottom of the interface, there are language options: "English | Français | Español | 中文".

If you don't have an account, click on **Sign Up** and follow the steps to create a new PayPal account.

2. Once logged in, come back to the admin panel and enter the email address linked with the PayPal account in the **Merchant Email** field.
