

## VdoCipher Configuration Guide

VdoCipher is a video hosting solution that allows the platform users to upload videos for courses. It enables adding videos from internal storage and their smooth streaming on the platform.

To find the related configuration settings, visit Manage Settings > General Settings > **Third Party APIs** > **VdoCipher**.

VdoCipher	
VdoCipher Api Key	
	VdoCipher Api key for uploading videos on third party.
VdoCipher Folder Id	
	Unique folder id to be retrieved from VdoCipher account where videos will be uploaded. Leave blank for root folder.

To collect the API Key, follow the steps given below:

## Collect the API Configuration Key

 Visit the VdoCipher website. Click Login from the upper right corner of the page.

Use your email address and password to log into your account.

<b>Vdocipher</b> Sign in	
Email address *	
Password *	
Login Forgot password?	Sign Up

However, if you don't already have an account on VdoCipher, click **Sign Up** from the homepage.

VdoCipher features pricing testimonials about contact

From the **Event** dropdown, select **video:ready**.

8. Once the details have been provided, click Create Web Hook.

## Configure the API Key on Yo!Coach

 Open the Yo!Coach admin panel. Move to Manage Settings > General Settings > Third Party APIs > VdoCipher. Paste the API key previously copied from the VdoCipher platform.

VdoCipher	
VdoCipher Api Key	
	VdoCipher Api key for uploading videos on third party.
VdoCipher Folder Id	
	Unique folder id to be retrieved from VdoCipher account where videos will be uploaded. Leave blank for root folder.

## Collect the Folder ID (Optional)

Once you start uploading your videos on VdoCipher in separate folders, you can choose to integrate only a specific folder with Yo!Coach through Folder IDs.

Please note that it is optional to add Folder ID on Yo!Coach. It is recommended to configure folder IDs when you are using VdoCipher for video hosting on more than one platform.

10. Click **Create Folder** from the upper right corner of the VdoCipher homepage and create a new folder for your videos.
